

LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION
MANDATORY LANGUAGE – TIER III

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

BHP Water Supply Corporation has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During January 1 – December 31, 2015 we did not monitor or test for Lead and Copper tap water sampling, and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant we did not properly test for during the last year, how often we are supposed to sample for Lead & Copper tap water sampling, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples are to be taken.

| Contaminant | Required sampling frequency | Number of samples taken | When samples should have been taken | When samples were or will be taken |
|----------------------------------|-----------------------------|-------------------------|-------------------------------------|------------------------------------|
| Lead & Copper tap water sampling | 20 samples every years | 0 | June 1 – Sept 30, 2015 | June 1 – Sept 30, 2016 |
| | | | | |

What is being done?

We are working to correct the problem. For information, please contact Mike Krider at 972-636-2154 or bhpwater@sbcglobal.net

(corrective actions)

Will be taking 20 samples beginning June 1, 2016
